

Warehouse bottleneck executive summary

Public showcase edition with proprietary scoring details withheld. Illustrative synthetic sample. A concise view of the warehouse bottleneck decision, the evidence behind it, supporting inbound/outbound pressure, how it changes over time, and the appropriately gated financial view.

PRIMARY BOTTLENECK

Picking

Leading operational pressure candidate across the uploaded warehouse records.

DECISION CONFIDENCE

High

EVIDENCE STRENGTH

Strong

DECISION CLARITY

Clear

Decision confidence and report reliability

High because Picking is clearly separated from the other operations, with consistent support across 1,800 prepared records.

DECISION CLARITY

Clear

REPORT RELIABILITY

High

Public showcase edition: proprietary scoring values, weights, thresholds, and calculation details are intentionally withheld.

Why Picking was flagged

Management-level evidence behind the decision; proprietary calculations are not shown.

- Multiple independent operational indicators consistently point to Picking.
- Picking is clearly separated from the alternative candidates.
- The time-based view supports the full-period decision.
- The decision is supported by 1,800 prepared records.

Inbound, outbound, and relative pressure

Local pressure cards show where operational pressure appears without exposing internal score construction.

Inbound and outbound pressure

These cards are supporting local views. The full-warehouse decision remains the primary result.

Inbound

LOCAL PRESSURE LEADER

Receiving

Next: Packing

Bottleneck over time

Rolling time windows show whether the bottleneck stays stable or moves over the analyzed period.

Bottleneck over time

Dominant timeline signal: Picking | windows with decision: 9/13

● Receiving ● Putaway ● Replenishment ● **Picking** ● Packing ● Shipping

The time-sliced view is supporting evidence; the full-period decision remains primary.

SCENARIO ESTIMATE

Growth upside

2,122 EUR

Estimated monthly impact if **Picking** is improved.

The financial inputs have not been confirmed with the warehouse, so values are illustrative.
